Data Archiving and Networked Services

DANS

DANS: an institute for data archiving in the Netherlands

3 core services:

- EASY (data repository)
- NARCIS (platform for scholarly information in the Netherlands
- DataverseNL (platform for exchange of data during projects)

→ Participation in international projects from the European Commission on research infrastructures

3-year project funded by European Commission (Horizon 2020)

Activities:

- Extend Persistent Identifier (PID) infrastructure
- Develop new PID types
- Build PID Graph
- Collaborate with RDA

→ Involved in communications work package which ensures that feedback from PID community is collected and taken up in deliverables

Expectations for ECEIG: to get to know other young members of the RDA, to get more familiar with the structure and networking possibilities of the RDA
